Subject: Microsoft Settlement

To- The Courts,and those whom are Concerned-

I am an American citizen 82 yrs. young,that loves computers,I have most of the lastest devices on my PC.while I dont pretend that I know how,to use all of these,programs etc.I do know that without companies such as Microsoft,we as a nation, would be hurting,in this field of endeavor.

You are inthe process of finalizing a settlement ,for which I as a Senior, believe is a reasonable compromise,that will enhance the ability of all concerned,to access the internet and use innovative products,for more enjoyment.

I know a little about techincal progress,having been a military pilot for many years,and its a good thing that there is competition,if there wasn't ,perhaps I would not be here today>

Competition in this situation,seems to want results,based on what the Courts will decide,rather than their own efforts.Only in America,it seems,that,one, or a Company ,is punished for their success.

It would appear that this has dragged long enough,we have a compromised settlement,please dont allow those who state,in the public interest, to muddy up this settlement !

I'm one of the,public,and as a Tax Payer,I strongly believe this should be settled,asap... Thanks for(Tunney Act) for allowing me to comment.

Very Truly Yours,
Joseph Burkhardt (srjburkhardt80@adelphia.net)
